4 Emmet
5 -----
6
7 Emmet plugin installed
8
9 Emmet is a web-developer's toolkit for boosting HTML & CSS code writing.
10
11 With Emmet, you can type expressions (abbreviations) similar to CSS selectors and convert them into code fragment with a single keystroke. For example, this abbreviation:
12
13 ul#nav>li.item*4>a{Item $}
14
15 ...can be expanded into:
16
17 <ul id="nav">
18   <li class="item1"><a href="">Item 1</a></li>
19   <li class="item2"><a href="">Item 2</a></li>
20   <li class="item3"><a href="">Item 3</a></li>
21   <li class="item4"><a href="">Item 4</a></li>
22 </ul>
23
24 Read more about Emmet for Sublime Text:

30 # Install
31 -----
32 Activate the 'Theme' by modifying your user preferences file, which you can find using the menu item
33 'Preferences -> Settings - User' in Sublime Text
34 on use
35 'Schemn' & 'Theme' by [Ben Weier](https://github.com/benweier).
36
37
38 ## Example
39 -----
40 ---
41 {
42   "theme": "Seti.sublime-theme",
43   "caret_extra_width": 2,           // to have a wider/thicker caret
44   "caret_extra_bottom": 3,         // to make the caret - to the line height (the theme currently support 0,3,5)
45   "caret_extra_top": 3,
46   "overlay_scroll_bars": "enabled", // to show scrollbars only when scrolling
47   "highlight_line": true,          // to highlight the current line
48 }
49 ...

69 SublimeCodeIntel
70 -----
71
72 SublimeCodeIntel
73 -----
74
75
76
77
78
79
80 A full-featured code intelligence and smart autocomplete engine for Sublime Text.
81 (Code intelligence plugin ported from Open Komodo Editor to Sublime Text)
82
83
84 ----- HELP WANTED -----
85 Maintaining this project is hard, I do it in my spare time, but I'm
86 basically all alone. If anyone is interested in contributing, please
87 contact me. I really need much more help maintaining SublimeCodeIntel
88
89 Follow me on twitter @gerbravo
90 You can find us at #sublimecodeintel on irc.freenode.net
91
92 If you like SublimeCodeIntel, please make a donation:
93 http://sublimecodeintel.github.io/SublimeCodeIntel/donate.html
94
95
96
97 Features
98 -----
99
100 Supports all the languages Komodo Editor supports for Code Intelligence (CIX, CodeIntel2):
101
102 JavaScript, Mason, XBL, XUL, XHTML, SCSS, Python, HTML, Ruby, Python3, XML, Sass, XSLT, Django, HTML5, Perl, CSS, Twig, Less, Smarty, Node.js, Tcl, TemplateToolkit, PHP.
103
104
105 Provides the following features:
106
107 * Jump to Symbol Definition - Jump to the file and line of the definition of a symbol.
108 * Imports autocomplete - Shows autocomplete with the available modules/symbols in real time.
109 * Function Call tooltips - Displays information in the status bar about the working function.
110
